SENSORS MADE IN GERMANY

Inductive Proximity Switches  
**19 - 60 mm**  
Sensing Distance

Non-contact detection of metal objects

AC - DC - Normally Open - Normally Closed -40 °C - +120 °C -10-100VDC

Type	<b>IKZ 475</b>	<b>IKI 025</b>	<b>IKF 025</b>	<b>IKQ 030</b>	
<b>PROXI Heat</b>	no	yes	yes	no	
<b>PROXI Polar</b>	no	yes	yes	no	

f = flush / nf = non flush

**PROXI Heat** Proxitron-high temperature series for temperatures of up to 120 °C.

**PROXI Polar** Proxitron-low-temperature series for temperatures from -40 °C.

The sensing distance stated above describes the axial approximation of a square steel plate with its side length equal to three times the sensing distance. (for example: Sensing distance 50 mm relates to a steel plate with side length of 150 x 150 mm). Smaller metal object reduces the maximum attainable sensing distance.

The attainable sensing distance is a function of the material of the metal object and can be calculated using the correction factor: **max. possible sensing distance = sensing distance x correction factor**

material	metal foil	steel	stainless steel	brass	aluminium	copper	nickel	cast iron
correction factor	1,2	1	0,5 ... 0,8	0,45	0,4	0,3	0,7	0,93 ... 1,05

# Inductive Proximity Switches

## Basic Information

Inductive proximity switches detect metal objects contactless. Proxitron offers the widest variety of robustly constructed designs for standard industrial solutions and complex applications. Versions with extended temperature range and the comfortable setting with teach-in enable safe operation even under demanding conditions. Customisations provide the optimum solution for every application.

- contactless detection of metal objects
- unaffected by contamination
- different supply voltages
- various switching outputs
- short circuit and reverse polarity protection
- ProxiHeat up to +120 °C
- ProxiPolar from -40 °C
- cable- or plug connection
- protection class up to IP68

## Type Code

\*Connecting cables are available in different lengths and materials. Please tell us your requirements. We will be pleased to advise you.

\*\* Proximity switches with Proxi-Teach™ recognise the existing installation conditions after one key is pressed and adjust the operating distance optimally. This enables safety operation under non-standard installation conditions. The effort upon startup is minimized.
